TERMS
Evolution **Global**

TERMS Evolution Global

A fully feature rich MIS product using an adaptable data platform.

This product is one system for many solutions due to it being uniquely intuitive, adaptable and fully featured.

TERMS
Evolution

TERMS Evolution **Global**

Taking the full power of the TERMS Evolution system onto the hosted internet, whilst maintaining the most secure system available within this sector.

Total freedom of access for your users and managers whilst maintaining total control of your data. This option gives you the most secure high-performance MIS available on the internet or any intranet.

TERMS Evolution Global

- ✅ Enrolments

- ✅ Reporting and Analysis
- ✅ SSRS Reporting
- ✅ WordPress Web Site
- ✅ Helpdesk Support
- ✅ Fully Hosted
- ✅ ISO 27001 Certified
- ✅ Documentation and Training
- ✅ Expandable System

Enrolments
A full and comprehensive enrolment system that is simple in its use. A trained operator can complete full enrolment of a new learner through to payment receipt in less than two minutes.

Courses and Curriculum
You have full control over Course and Curriculum information, including planning. The system contains a simple method of copying and generating courses, including full timetables, as well as allowing for complete analysis and control.

Examinations
Full tracking of Learner details is standard within TERMS Evolution. In addition the system will maintain current and historic details of all Learner activity, providing for reporting and trend analysis.

Web Courses
An integrated web front end system intended for course searching and detailed information, with Google Analytics and Facebook Pixel analysis.

Web Enrolments and Tutor Module
Learners can and pay for courses online. Tutors can mark attendance with online registers and record results where applicable – e.g. for RARPA and IAG sessions.

Room and Facility Booking
A flexible and powerful module that can be used on its own as well as being optionally integrated into the rest of the system. This gives control over any asset that needs to be reserved for a period of time – rooms, equipment, catering, etc. – including the ability to run full conferences.

Security
The most complete security system available in the market, but delivered in such a way that it does not interfere with system use. With data protection issues being a continuing concern, you cannot afford to run an "open" system.

Funding and Statistics
Offering one of the most in depth and competitive funding modules available that will power your complete funding requirements, whilst retaining historic information for reference and analysis. With the additional Global features, statistics, analysis and reporting can be performed on any funding data or available combination.

Learners
As the basis for all users, a good Learner system is vital to the successful running of a modern MIS System. You are not limited on the number or nature of Learners, year by year or by license, rather all of your Learners are maintained for full use and analysis.

Staff and Tutors
Staff and Tutors can be simply recorded against Courses, Exams and other Activities and the full power of the Contract and Pay Processing system can be used.

Accounting and Finance
A complete financial accounting package that will allow you to fully control and report upon all of your financial transactions. You can either use this as your prime accounting package or as a feed, or verification, for your main accounts.

Reporting and Analysis
Reporting and analysis is the resultant need of both management and administration. All versions come with a complete suite of reporting and analysis tools with a report designer available in the Global version.

Why host with us?

Hosting with West March Systems helps you keep your IT overheads low, and lower still when you expand or change locations as there's no need to purchase expensive equipment for staff.

We use a patented connection solution that gives you access to your system using advanced encryption to ensure your data is safe and secure.

Book a Demonstration

We can give you an online demonstration of TERMS and walk you through the system. Simply contact us and we will start the process

Request a Quotation

Let us know the size of your service and we will give you a formal quotation for your system.
