- ✓ Helpdesk Support
- ✓ Fully Hosted
- ✓ ISO 27001 Certified
- ✓ Documentation and Training
- ✓ Option to move to Evolution Global

### **Enrolments**

A full and comprehensive enrolment system that is simple in its use. A trained operator can complete full enrolment of a new learner through to payment receipt in less than two minutes.

### **Funding and Statistics**

Offering one of the most in depth and competitive funding modules available that will power your complete funding requirements, whilst retaining historic information for reference and analysis. With the additional Global features, statistics, analysis and reporting can be performed on any funding data or available combination.

### **Courses and Curriculum**

You have full control over Course and Curriculum information, including planning. The system contains a simple method of copying and generating courses, including full timetables, as well as allowing for complete analysis and control.

### **Learners**

As the basis for all users, a good Learner system is vital to the successful running of a modern MIS System. You are not limited on the number or nature of Learners, year by year or by license, rather all of your Learners are maintained for full use and analysis.

### **Examinations**

Full tracking of Learner details is standard within TERMS Evolution. In addition the system will maintain current and historic details of all Learner activity, providing for reporting and trend analysis.

### **Staff and Tutors**

Staff and Tutors can be simply recorded against Courses, Exams and other Activities and the full power of the Contract and Pay Processing system can be used.

### **Web Courses**

An integrated web front end system intended for course searching and detailed information, with Google Analytics and Facebook Pixel analysis.

### **Accounting and Finance**

A complete financial accounting package that will allow you to fully control and report upon all of your financial transactions. You can either use this as your prime accounting package or as a feed, or verification, for your main accounts.

### **Room and Facility Booking**

A flexible and powerful module that can be used on its own as well as being optionally integrated into the rest of the system. This gives control over any asset that needs to be reserved for a period of time – rooms, equipment, catering, etc. – including the ability to run full conferences.

### **Reporting and Analysis**

Reporting and analysis is the growing need of both management and administration. All versions come with a complete suite of reporting and analysis tools with a report designer available in the Global version.

### **Security**

The most complete security system available in the market, but delivered in such a way that it does not interfere with system use. With data protection issues being a continuing concern, you cannot afford to run an “open” system.

## Why host with us?

Hosting with West March Systems helps you keep your IT overheads low, and lower still when you expand or change locations as there's no need to purchase expensive equipment for staff.

We use a patented connection solution that gives you access to your system using advanced encryption to ensure your data is safe and secure.

## Book a Demonstration

We can give you an online demonstration of TERMS and walk you through the system. Simply contact us and we will start the process

## Request a Quotation

Let us know the size of your service and we will give you a formal quotation for your system.
