- ✅ Reporting, analysis and statistics
- ✅ SSRR and BI reporting
- ✅ WordPress Web Site
- ✅ Helpdesk Support
- ✅ Fully Hosted
- ✅ ISO 27001 Certified
- ✅ Documentation and Training
- ✅ Expandable System

Enrolments

A full and comprehensive enrolment system that is simple in its use. A trained operator can complete full enrolment of a new learner through to payment receipt in less than two minutes.

Courses and Curriculum

You have full control over Course and Curriculum information, including planning. The system contains a simple method of copying and generating courses, including full timetables, as well as allowing for complete analysis and control.

Examinations

Full tracking of Learner details is standard within TERMS Evolution. In addition the system will maintain current and historic details of all Learner activity, providing for reporting and trend analysis.

Online Courses, Enrolments and User Accounts

An integrated web front end for course searching, detailed information and enrolments with payment options. Assessment sessions can be booked online with the Learner selecting their own assessment appointment. Learners can access their own enrolments, links to venues and online sessions. They can approve Learner Agreements online and record their Destination and Progression.

Online Registers, Results and Staff Reporting

Attendance tracking and recording via online registers, with the option to allow the tutor to record results and to RAG rate Learners for achievement. To assist in D&P recording, Tutors can directly record the D&P of Learners on their courses. Staff can access online reports and a dashboard for on demand analysis and details. A staff to admin messaging system is also included.

Room and Facility Booking

A flexible and powerful module that can be used on its own as well as being optionally integrated into the rest of the system. This gives control over any asset that needs to be reserved for a period of time – rooms, equipment, catering, etc. – including the ability to run full conferences.

Security

The most complete security system available in the market, but delivered in such a way that it does not interfere with system use. With data protection issues being a continuing concern, you cannot afford to run an "open" system. The entire system is ISO27001 Certified.

Funding and Statistics

Offering one of the most in depth and competitive funding modules available that will power your complete funding requirements, whilst retaining historic information for reference and analysis. With the additional Global features, statistics, analysis and reporting can be performed on any funding data or available combination.

Learners

As the basis for all users, a good Learner system is vital to the successful running of a modern MIS System. You are not limited to the number or nature of Learners, year by year or by license, rather all of your Learners are maintained for full use and analysis.

Staff and Tutors

Staff and Tutors can be easily recorded against Courses, Exams and other Activities along with the full power of the Contract and Pay Processing system being utilised. Comprehensive records, including training and qualification. Online the staff can access reporting with tutors being able to record attendance, send messages, record achievement, RAG rate Leaners and record D&P.

Accounting and Finance

A complete financial accounting package that will allow you to fully control and report upon all of your financial transactions. You can either use this as your prime accounting package or as a feed, or verification, for your main accounts.

Reporting and Analysis

Reporting and analysis is the resultant need of both management and administration. All versions come with a complete suite of reporting and analysis tools with a report designer available in the Global version. The internal reporting is supplemented by SSRS and Power BI Reporting, together with the online availability of reports and a data dashboard.

Surveys, Notifications, Emails and SMS

Keeping in touch with Learners is critical and this can be automated with Surveys, Notifications, Emails and SMS texts. Remind Learners of their upcoming course details; request Learner Agreement approval; ask for their Destination and Progression; publish announcements; ask for a Questionnaire to be completed before, during or after learning. Automated messaging and reminders will ensure that contact with Learners is both current and relevant.

TERMS Evolution **Global**

Why host with us?

Hosting with West March Systems helps you keep your IT overheads low, and lower still when you expand or change locations as there's no need to purchase expensive equipment for staff.

We use a patented connection solution that gives you access to your system using advanced encryption to ensure your data is safe and secure, yet you only need to use a standard web browser.

We will give you first class support without a lot of delays and bureaucracy.

Online Training

We provide live online training and remote online courses. These sessions go through all the basics from connecting into the system through to enrolment and payments, with additional sessions for administration, reporting and analysis, finance and any area that is required for running your service

Direct Support

We pride ourselves in the level and quality of our Support. Unlike many other Support Desks, we do not simply assign a ticket number and respond slowly. Our aim is to support users directly to a quick conclusion of their issues.

Book a Demonstration

We can give you an online demonstration of TERMS and take you through the system. Simply contact us and we will start the process.

Request a Quotation

Let us know the size of your service and we will give you a formal quotation for your system.
